CONTENT OF THE COURSE

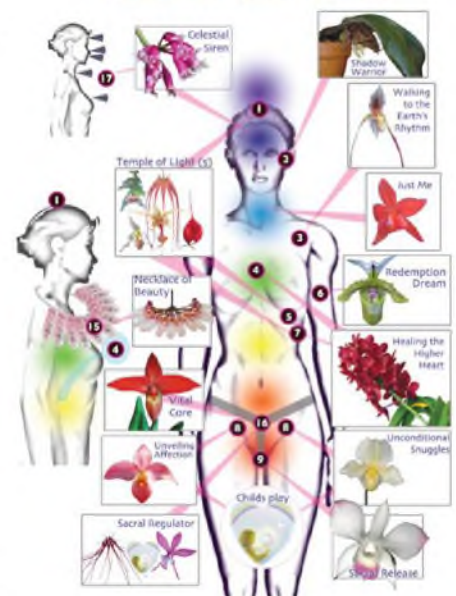

This course will give a thorough introduction into "Therapeutic Energy Kinesiology" (TEK) including explanations of the basic principles of TEK, its validity as a system of healing and its use in a practical setting; discussions will outline its limits and contra-indications.

Dr. Adrian Brito-Babapulle, a homeopath and kinesiologist AK, licensed in the United Kingdom, has developed the TEK system in the 1990-ies. This kinesiology system is based on principles taken from Qi Gong, Chinese Medicine, the chakra model, energy gates, Weihe and trigger points. It tests for physical, nutritional, emotional and energetic imbalances. The goal of a session is to balance the energy system of the client.

Living Tree Orchid Essences (LTOE; <http://www.healingorchids.com/>) are central to this therapeutic system to support the self-healing capability of the client by strengthening specific healing centres (identified by Dr. Brito-Babapulle).

Furthermore mediations will be performed to chakra music that has been created by Dr. Brito-Babapulle with a professional composer/musician.
